**IN RE: KALISPEL TRIBE OF INDIANS'
CLEAN AIR CLASS I REDESIGNATION**

PUBLIC HEARING

**HELD ON
MONDAY, APRIL 10, 2017**

**BEFORE
TAYLOR FIELDING, HEARING EXAMINER**

**KALISPEL TRIBE OF INDIANS'
CAMAS CENTER FOR COMMUNITY WELLNESS
1821 LECLERC ROAD NORTH
CUSICK, WASHINGTON 99119**

1 IN RE: KALISPEL TRIBE OF INDIANS'

2 CLEAN AIR CLASS I REDESIGNATION

3 PUBLIC HEARING

4 HELD

5 MONDAY, APRIL 10, 2017

6
7 MR. PIERRE: Hello. Good evening. Ray
8 Pierre here. I'm the Vice Chair of the Kalispel
9 Tribe here. We're going to get started. Sorry
10 we're a little bit late. So I am going to open with
11 an opening prayer. I'm going to hand it off to
12 Council Secretary Holmes, who will kind of start
13 after that. So, here we go. Thank you, Grandfather.
14 I ask you to bless everyone here tonight, have
15 everyone use good words and be respectful, get some
16 information and educate themselves on the tribe's
17 process here. We're all neighbors and we all share
18 this valley. I think the tribe does our part. I
19 think our neighbors do our part, and we're hoping to
20 just work together and just do some good here. So
21 (indiscernible). So, this is Darren Holmes.

22 MR. HOLMES: Hello, everybody. In the
23 back, can everybody hear me okay? All right. As Ray
24 said, I'm Darren Holmes and I'm the Kalispel tribal
25 council member, secretary, officer position, and

1 tribal administrator. On behalf of the tribe, I'd
2 just like to thank all of you for coming to this
3 public hearing tonight. I know there are a lot of
4 rumors out there right now about potential effects
5 on our Class I rededication application, so I just
6 wanted to take a few minutes before calling
7 prominence to explain what the tribe is seeking to
8 redesignate the reservation as a Class I area and
9 how the decision -- may affect the community.

10 From the tribe's standpoint, the why is
11 straightforward. HiTest Sands wanted to build a
12 silicon smelter less than a mile upwind of the
13 reservation, and the tribe is concerned that the
14 emissions from the smelter will poison the air and
15 harm the Kalispel people, community, and our natural
16 resources. We've asked HiTest for information that
17 allay this concern, but they haven't provided any of
18 it yet. The tribe has determined that the Class I
19 redesignation will help protect the reservation from
20 industrial air pollution if the smelter or another
21 similar facility is built near the reservation.

22 And I know the how is more complicated
23 because it requires an understanding of how the
24 Class I redesignation works. A Class I
25 redesignation is the way for federally-recognized

1 Indian tribes to protect reservation air quality
2 under their clean air -- the federal Clean Air Act,
3 prevention of significant deterioration, also known
4 as the PSD program. The PSD program does this by
5 placing a limit on how air shed quality can be
6 degraded by emissions from what the Clean Air Act
7 calls major stationary sources.

8 These types of sources are things like
9 fuel refineries, steel mills, and (indiscernible)
10 cement plants that are capable of emitting at least
11 a hundred tons of (indiscernible). Importantly, PSD
12 review is only required for new, major stationary
13 sources or major modifications to existing large
14 stationary sources.

15 So I'd just like to be (indiscernible) -- so
16 four things that I'd like to clear about: Class I
17 redesignation will not affect every day rural
18 activities like using a wood stove, burning brush,
19 long fields, and driving on dirt roads. Class I
20 redesignation will not affect existing facilities
21 such as Ponderay Newsprint's (indiscernible) unless
22 future modifications to those facilities are
23 significant enough to trigger the prevention of
24 significant deterioration's review. Class I
25 redesignation will not affect the vast majority of

1 new industrial development.

2 There are in fact only 11 PSD-permitted
3 facilities in all of eastern Washington. Class I
4 redesignation won't prevent the HiTest smelter or
5 other major stationary sources from locating in Usk,
6 if they are willing and able to install pollution-
7 control technology that keeps emissions within the
8 Class I allowances. So in closing, I just want to
9 emphasize the Class I redesignation that the tribe
10 is seeking is not an attack on all of our rural way
11 of life. We see it as a way of protecting our
12 community from industrial developments that might
13 otherwise harm our health and natural resources.

14 The tribe always has, and we still
15 continue to support economic development in our
16 region, and we believe it is fair to ask industrial
17 developers like HiTest to meet Class I allowances or
18 find another place to do business. So with that, I'd
19 just like to say that we're looking forward to your
20 comments. At this time, we'll have Taylor Fielding,
21 who is a hearing examiner, go over the, I guess the
22 process for your comments.

23 **MR. FIELDING:** Thank you. I am Taylor
24 Fielding. I am the designated hearing examiner. I
25 am the attorney with Kalispel Tribe. Basically what

1 a hearing examiner (indiscernible). So today, the
2 first part of the hearing, we're going to take the
3 lists of people who signed up to speak. We're going
4 to take oral testimony of those people. We're
5 limiting this to three minutes. Please don't take
6 more than your three minutes out or respect for
7 everybody that wants to speak. At the end of taking
8 the testimony from who signed up to speak, the
9 natural resources staff will do (indiscernible) Q&A
10 as time allows.

11 So (indiscernible) asking people to try
12 and stay under their three minutes. The testimony is
13 being recorded. The whole hearing -- the whole
14 process today (indiscernible) is being recorded. If
15 you don't have time to finish your speech in three
16 minutes, you can make written comments. Or if you
17 decide to go along -- to speak, you'd rather
18 (indiscernible) comments, the tribe will take
19 comments. The actual written period -- the comment
20 period had actually closed last Friday, but the
21 tribe's going to take written comments up through 5
22 o'clock on Friday the 14th of April. That's this
23 coming Friday.

24 We will have visual signals for those who
25 are speaking to let them know when you're getting

1 close to the end of your three minutes. We have
2 enough copies of the (indiscernible) just came in.
3 I know we ran out. They were going to make some
4 more copies. I think that's about it, so I will get
5 the first name and why don't you come on up and
6 state your name and your affiliation, if any,
7 (indiscernible) organization for the record.

8 And we'll start the comment period. Okay.
9 So our first person that has asked to give oral
10 testimony is Mark Davis of Three Enterprises. If
11 you'd like to come forward, please.

12 MR. DAVIS: Good evening, everybody. The
13 first thing I'd like to say is I'm glad to see
14 everybody that came out. I see most everybody in
15 here, recognize a lot of faces, and they're all
16 hard-working people like myself and have been here -
17 - I've been here for a lifetime. Just want to let
18 you know that. I care (indiscernible). This is my
19 home. When I grew up, a lot of the people that grew
20 up with me wanted to move away from here. They
21 wanted to go find their places in the city. They
22 wanted to do this. I stayed here. This is my home.
23 This is where I'm going to be.

24 And all these people in this room I'm
25 going to see at the grocery store and everywhere

1 else. Here's the part that concerns me about this
2 proposal to go to a Class I reservation. The first
3 thing is, and I've got (indiscernible) about this,
4 so please bear with me. We're going to lose this
5 fight. They got it planned out. This is already
6 done. And this is just a little nicety to let us
7 vent a little bit. So what we need to do is we need
8 to stand up, we need to watch for what's coming.

9 We need to see what the issues are and we
10 need to start coming out here. So I've already been
11 at work today about 14 hours and then came to this
12 meeting. I'm a builder in the area. I've worked at
13 Ponderay Newsprint for almost 15 years. I've worked
14 there when there was a locomotive -- three of them,
15 as a matter of fact, sent down here blowing
16 emissions into the air, and we weren't concerned
17 about that. There was a possibility of bringing some
18 jobs to this area, getting people off of thieving,
19 going to your house or breaking into your shop,
20 taking your stuff.

21 And we could have brought some jobs in
22 here and actually regulated some of the emissions
23 that were coming out of this. We're talking about
24 this for environmental standards. I want to know
25 where the environmental issues are for China. We

1 send stuff overseas. There's no environmental
2 standards. That air comes over here. We live in a
3 biosphere. So I'm not going to buy that issue. And
4 I know as we move forward, for our children and our
5 grandchildren, we have to intelligently develop our
6 emissions standards. But I'll take a Toyota Prius,
7 for example. They say it's green. They say this.
8 They say that.

9 Well, I'll tell you what. Look into it.
10 There's more hazardous waste that comes from making
11 a Prius than there is from your average little
12 Nissan Sentra. Well, how about we bring that back to
13 the United States and we bring that back to Pend
14 Oreille County. When I grew up here, there was six,
15 seven sawmills in this area. Men were working. You
16 could take a chainsaw and (indiscernible) and make a
17 living. But you're not going to today. You can't
18 even afford to go to work because you have to have a
19 secretary in your office to be able to --

20 **MR. FIELDING:** Mr. Davis, your three
21 minutes are up. Thank you.

22 **MR. DAVIS:** Thank you, sir.

23 **(Applause.)**

24 **MR. FIELDING:** The next speaker is Oscar
25 Garza (phonetic).

1 **MR. GARZA:** Good afternoon. My name is
2 Oscar Garza and I'm a student at SEAT (phonetic)
3 (indiscernible) and ecology. I see (indiscernible)
4 some jobs and the environment. I see
5 (indiscernible) realize (indiscernible).
6 (Indiscernible) doing about nature and logging. So
7 really, I obviously come from an (indiscernible)
8 only sees one percent in nature. So (indiscernible)
9 coal, gas, fossil fuels by itself (indiscernible)
10 worse, (indiscernible) and reduces by itself
11 (indiscernible). (Indiscernible) grow.

12 How plants grow to reach (indiscernible).
13 So you will affect the (indiscernible) for those who
14 like logging or (indiscernible) logging.
15 (Indiscernible) at all. Now we'll create a house of
16 (indiscernible). (Indiscernible) refineries,
17 illegal manufacturing and danger -- endanger
18 (indiscernible) for those who do some agriculture.
19 (Indiscernible) family compounds. You will affect
20 the (indiscernible).

21 Not only that, you will ruin down to the
22 water, our water system and aquifers. We're losing
23 our (indiscernible) around here. (Indiscernible)
24 pollution (indiscernible) high concentrations of
25 (indiscernible) water (indiscernible) fishing, they

1 go out and they like nature. (Indiscernible) to
2 grow faster than we can handle it. The road is very
3 hard to contain. We will deplete the
4 (indiscernible) and in the water. We will
5 (indiscernible) or slow down (indiscernible) aquatic
6 (indiscernible).

7 Everything (indiscernible) is I
8 (indiscernible) concentrate (indiscernible) you will
9 affect. Now, with (indiscernible) China, they still
10 have people work (indiscernible). You see the
11 amount of rays of hell there. It is incredible. So
12 we're between (indiscernible) I'm sorry to say
13 (indiscernible). But it is (indiscernible) facts.
14 This is facts.

15 (Indiscernible) science. This equals
16 science. (Indiscernible) chemical reaction. You
17 can (indiscernible) on a carbon side. So, we're
18 (indiscernible) future, but the best we can to the
19 generations we have. Right now, most of us here
20 will not be here in the next hundred years. We'll
21 be gone. I hope we're going to inherit something
22 (indiscernible) 50 years or more. So (indiscernible)
23 of all the different generations. Thank you.

24 **MR. FIELDING:** Thank you, Mr. Garza. The
25 next individual signed up is Bob Holmes (phonetic).

1 **MR. BOB HOLMES:** Hi. My name's Bob
2 Holmes, 61 years old and I've lived here all my
3 life. My son is Darren. Obviously we have a little
4 opposite -- not opposite sides, but misinformed. My
5 point here, my concern, in my opinion, I believe the
6 tribe is being used as a tool to bring the EPA and
7 extend its area around this whole place.

8 **AUDIENCE MEMBER:** Amen.

9 **AUDIENCE MEMBER:** Yes.

10 **(Applause.)**

11 **MR. BOB HOLMES:** This is a foot in the
12 door for EPA. No (indiscernible) -- you know, and
13 you can start all the regulations you want, but the
14 thing is, regulations change. This is a foot in the
15 door to get a change at any time down the road. As
16 far as (indiscernible) goes, (indiscernible) they're
17 made of particulate matter, and it's right here on
18 the tribe's own study. Table 13 where it lists
19 recreational (indiscernible) -- this is just a few.
20 Construction, fertilizer application, lifestyle
21 ways, (indiscernible) residential or outdoor
22 gardening, (indiscernible) sources, (indiscernible),
23 woodstove, fireplaces and inserts.

24 So don't get me wrong. I absolutely agree
25 with our point on this, about the factories. I

1 think the majority of the people here would, too.
2 We don't -- we don't live here to destroy all of our
3 -- but they are -- the scope of this is way bigger
4 than people are seeing. I think the tribe is being
5 misinformed myself, basically. (Indiscernible),
6 that's my opinion. But I (indiscernible) know how it
7 works. It's -- they're very trendy because EPA
8 (indiscernible) particulate matter.

9 Once (indiscernible) they're not going
10 forward and start just a plant. They're going to
11 focus on everything because that's their control
12 factor. Another thing. I believe -- you know, I
13 know there's quite a division sometimes. It's not
14 like it used to be. It would be my wishes, if
15 possible, that the tribe and the people across the
16 river all worked together.

17 I think there's probably some
18 (indiscernible) at county government also here for
19 not being upfront with them. If they're not upfront
20 with them, they're not being upfront with us. If
21 they can't be transparent, then maybe we ought to be
22 watching over them a little more. Like I say,
23 there's more to this than any of us know, I believe,
24 including the tribe. And I just wish more people
25 could work together.

1 I turn to my son, maybe we can get some
2 tribal people and people from across the river to go
3 to these county commissioners' meeting and see what
4 the heck is going on there. If they're not telling
5 them, they're keeping it away from us, too.

6 MR. FIELDING: Thank you, Mr. Holmes.

7 MR. BOB HOLMES: One more thing. One
8 thing I have to say. If anybody -- if anyone should
9 know that they can't trust government, it should be
10 the Kalispel people.

11 (Applause.)

12 MR. FIELDING: The next person we have
13 signed up to speak is Bobby Jean (phonetic).

14 MR. JEAN: Thank you very much. What I
15 really want to do is commend the Kalispel Tribe for
16 bringing this issue forward to us because I think
17 it's for the benefit of the entire county, not just
18 the tribal lands. What the county commissioners
19 discuss routinely -- and I go to a lot of their
20 meetings -- is (indiscernible) would like to bring
21 in (indiscernible) Pend Oreille County, but they
22 want it to be a clean industry.

23 (Indiscernible) polluting and making us
24 all sick. What I see in this proposal by the tribe
25 is that it's going to assure that we have a healthy

1 environment, not only for our elders and our
2 children and our grandchildren which are very
3 important to us, but also a healthy environment for
4 the game in our forests, healthy environment for the
5 fish in our waters.

6 This -- if this is accepted, I believe it
7 will help encourage tourism and will provide good
8 hunting grounds for those who live here and hunt
9 routinely, for those who fish. I think this is a
10 win-win-win situation that's being proposed and I
11 would very much encourage the designation being
12 changed from Class II to Class I. Thank you.

13 **(Applause.)**

14 **MR. FIELDING:** The next individual is Bob
15 Mitchell.

16 **MR. MITCHELL:** Thank you. I was hoping to
17 get more information here, but apparently there's
18 not the format. That's (indiscernible) that they
19 received at the door and other documents. I noticed
20 some discrepancies in as far as contradictions and
21 funny wording that is double-talk that makes people
22 really not very trusting of what's going on. Like
23 there was a number three item and it's the first
24 sentence on the last page. Propose you read this
25 and then you go answer it.

1 (Indiscernible) of the Kalispel Indian
2 Reservation. You know, there's another -- other
3 ways to write and inform people, to say that without
4 being so tricky. One of the other -- a couple of the
5 other items that I was curious about is, is there a
6 dollar amount involved in this grant? What funding
7 year for EPA is this money to be spent? Who decides
8 how the money is to be spent? Is there any kind of
9 a governing body that involves different
10 stakeholders to help make decisions so people here
11 feel good about what's happening to the community?
12 Thank you.

13 (Applause.)

14 MR. FIELDING: The next individual is Oral
15 May.

16 MR. MACOMBER: Macomber?

17 MR. FIELDING: I'm sorry, did I
18 (indiscernible) that name?

19 MR. MACOMBER: You did just fine.

20 MR. FIELDING: Okay.

21 MR. MACOMBER: I don't know what to say
22 except that I just don't trust it. I mean, I -- I
23 am very appreciative of the tribe's efforts in
24 keeping the smelter from my backyard. I really
25 appreciate that. But this is just -- to me, it's

1 just going from way on one side to way on the other,
2 and I just wish that we could just govern ourselves.
3 I don't trust EPA. And I'll just be watching this
4 to see how my life is going to change, you know, as
5 far as -- I (indiscernible) with it.

6 (Applause.)

7 MR. FIELDING: The next individual is John
8 Driver.

9 MR. DRIVER: My name is John Driver. I
10 farm 400 acres of primarily Timothy hay ground from
11 Flowery Trail to Granite Lake. In my business, one
12 of my largest concerns is a weed called Ventenata
13 dubia. Ventenata dubia causes \$139 million a year
14 in economic damages in northern Idaho and eastern
15 Washington. University trials conducted in Usk and
16 other areas of northern Idaho and eastern Washington
17 suggest herbicides have poor control while tillage
18 and (indiscernible) show the best control on this
19 economically-damaging weed's at 80 percent. I'm
20 concerned the proposed regulations will limit my
21 integrated best management options, reducing my
22 ability to till, rotate crops, my ability to use the
23 most current research and to best manage our natural
24 resources. Thank you.

25 (Applause.)

1 **MR. FIELDING:** The next speaker is Sandy
2 Hay (phonetic).

3 **MS. HAY:** Hi. So a lot of my concerns
4 people have already spoken about, but I'll talk to
5 you about some that haven't been. I do respect the
6 tribe for not wanting industries to come in that are
7 going to totally pollute our area. I've lived here
8 for 58 years. My family has lived here for way past
9 100 on the Pend Oreille River, alongside the
10 Kalispel Tribe. My parents, grandparents were
11 friends with a lot of the older tribal members. And
12 we've always respected our environment.

13 We've always been loggers, we've always
14 burned firewood, but we've done it in a smart way.
15 Yes, as of now we're being promised all these
16 things, that we will be able to burn wood, we will
17 be able to have dirt roads, all the things that are
18 said in this paper. My concern is in five years
19 that all of a sudden, no, you can't. You can only
20 burn firewood in an EPA-approved stove, which I
21 have. I bought a brand-new one. It don't heat my
22 house.

23 I can't burn a hot enough fire to heat my
24 house here. And also, I want my children to be able
25 to stay in this community and live. We do love it

1 here. We love everything about it here. But we
2 want to stay here. My kids want to stay here. Teck
3 Cominco maybe has five more years at the most and
4 they're not going to be here.

5 You say that it's only going to affect the
6 industries that are the ones that are causing the
7 bad pollutants. My fear is that's not what's going
8 to happen. We're going to have a lot of industries
9 that look at us and say: Wow. They have way more
10 regulation than most of the United States. We're
11 not even going to bother to come up there. The
12 tribe, you guys have now -- you have a casino out in
13 Spokane. You can keep all of your people employed.

14 That isn't what my kids could do if they
15 want to stay here. It's not what my grandkids could
16 do. So, you know, I just want you guys to consider
17 us that are here that don't have every funding,
18 other ways. We can't get the EPA in to come in and
19 fund us and, I'm not sure, maybe make money for the
20 tribe. I don't know. I don't know those answers.
21 But those are just some other concerns I have.

22 Thanks.

23 **(Applause.)**

24 **MR. FIELDING:** The next individuals who
25 signed up to speak are Matt and Jenna?

1 JENNA: Pass.

2 MATT: Pass.

3 MR. FIELDING: Okay. Next person on the
4 list is James Holey (phonetic).

5 MR. HELING: Healey (phonetic).

6 MR. FIELDING: Heling. Sorry.

7 MR. HELING: My name is James Healey. I
8 work at Pend Oreille County DV. Most of what I want
9 to say has been said this evening, but I want to
10 speak my mind. This is a very bad thing. I don't
11 see how this is going to benefit Pend Oreille County
12 in any way. I don't know if you all know this, but
13 it is really expensive to live here. There isn't
14 that many good jobs here. This isn't going to bring
15 any good jobs in. I'm not going to work at a
16 casino. I can't think (indiscernible) you wouldn't
17 have anything. I don't know where the pollutants
18 come from in this county and what they're worried
19 about, as far as I'm concerned.

20 They obviously chase (indiscernible).
21 Don't know that I want the smelter in Pend Oreille
22 County, but it would be nice to have something else.
23 This county depends on logging, whether anybody
24 wants to admit it or not. We did have a cement
25 plant. That got shut down because the railroad

1 left. There isn't that much here left. So we need
2 to accept these things that come to us.

3 If you put a Class I on here, it's going
4 to be just like she said. They're going to look at
5 that, see that, and just go right on past the map.
6 It's not going to happen. Nobody is going to build
7 here. There is no money to do that. Where is the
8 benefit? It's just going to be a struggle. The
9 other thing I don't know is why would the tribe
10 implement this on the rest of us? Why? There's a
11 few of them and a lot of other people that live in
12 Pend Oreille County that might not want to do this.
13 They want to work. They want to have a good job.

14 **AUDIENCE MEMBER:** Amen, brother.

15 **MR. HEALEY:** There's no way this is going
16 to be good. I can't see it. They make
17 (indiscernible). They took the fish out of our
18 river. Anybody who knows me has already heard that
19 story. They don't do it in a nice way. They do
20 whatever they want. Nobody gets to say anything
21 about it. So that's pretty much my piece. The thing
22 about the paper mill. It says Class I redesignation
23 will have no effect on Pend Oreille County
24 Newsprint's current operations. This is some of the
25 stuff that other people talk about.

1 This is just written to sound good. It
2 says current operations. What if Ponderay Newsprint
3 wanted to bring another generator and burn 600
4 gallons of diesel a day to try and get through
5 because they can't get chips? Then what? No,
6 that's not going to happen. Then what are they
7 going to do? Spend a lot of money to put an
8 electric chipper in. Do they have that kind of
9 money? Do they want to deal with that kind of
10 stuff? No. (Indiscernible). We're struggling.
11 Everybody struggles here. We can't have any more
12 regulation. It's not going to work. Thanks for
13 your time.

14 **(Applause.)**

15 **MR. FIELDING:** The next speaker is Gersh
16 Herber (phonetic).

17 **MR. HERBER:** Some of you know me, some of
18 you don't. For the last 14 years, I was the water
19 treatment operator and wastewater treatment operator
20 for Cusick. For 15 years before that, I was a water
21 treatment operator in wastewater treatment operator
22 for Los Angeles Department of Water and Power. So
23 I've did big and I've did small. The one thing I
24 have learned, EPA, Department of Health, Department
25 of Ecology, they never, ever ease up. Whatever kind

1 of regulations you get in now, it's going to be
2 worse.

3 AUDIENCE MEMBER: Amen.

4 MR. HERBER: And these people, they have
5 nothing else to do except to keep themselves
6 employed by making up more rules, more regulations
7 to where it's impossible for any kind of business,
8 any kind of industry, any kind of anything to exist.
9 It may seem like a small thing now, but it turns
10 into a snowball effect. And it can turn into an s-
11 storm, if you get my drift. So I'm warning you now.
12 If you let a foot in the door, it will not get
13 better. I've been there. I've battled those guys
14 for 30 years. Thankfully, I don't have to do it
15 anymore, I'm retired, so -- but anyway, just a
16 warning. Dropping the mic.

17 (Applause.)

18 MR. FIELDING: Our next speaker will be
19 Kelly Driver.

20 MS. DRIVER: I probably don't need this,
21 but... My name is Kelly Driver, and I've been in
22 this county the majority of my life. Generations of
23 my family here. Pend Oreille County is my home.
24 I'd like to keep it that way. Like Sandy Hay, I
25 want my kids here. I want my grandkids here. Based

1 on Darren's opening statements, he said that there
2 will be no effect on existing businesses. Darren, I
3 challenge that statement. Your statement does not
4 take into consideration that minor sources,
5 businesses like Vaagen Brothers, Ponderay Newsprint,
6 the railroad will have to go -- will likely have to
7 go (indiscernible) with any air remodification. So
8 hypothetically, if Ponderay Newsprint wanted to
9 become a toilet paper producer, he could "chht"
10 modifications.

11 And a permit that costs roughly \$10,000 in
12 consulting services will now double. That's the
13 services. That doesn't mean that the model -- the
14 costing that -- all the process that they have to go
15 through. Ponderay Newsprint going to stay when they
16 have to put a million dollars or -- and that's what
17 this said. (Indiscernible) or they're going to
18 leave. They're going to say enough. There's a lot
19 of you here that work there. Your families work
20 there. I want them here. I hope you do, too. Class
21 I is a deterrent, like many of you have said. You
22 put Class I stamp on Pend Oreille County and people
23 are going to go, nope.

24 They're going to go to a Class II
25 designation. They don't need the hassle. They

1 don't need the regulations. I don't know anybody in
2 this room who doesn't want clean air or clean water
3 for your families, like what we have now. And I
4 believe that those of us -- I believe our county
5 commissioners would fight for that. HiTest Sand did
6 not bring any information to the table at the time
7 that we were having these meetings.

8 Darren, you were there. You asked for the
9 information. We didn't have it. I got one minute,
10 so I've got to hurry up. To keep our current
11 businesses here, we need to keep our costs down and
12 not add more rules and regulations or department
13 interference. We do not need and want the EPA here.
14 We don't want Department of Ecology here any more
15 than we have to. And I've had enough.

16 **(Applause.)**

17 **MR. FIELDING:** The next speaker is Steve
18 Dalm (phonetic).

19 **MR. DALM:** All right. This is really
20 scary for me because I have stage fright, so
21 (indiscernible) people.

22 **(Laughter.)**

23 **MR. DALM:** I thought I was on the bottom
24 of the list and this would be, like, way late and I
25 wouldn't have to say anything. I just wanted to say

1 that all my friends from the tribe, I love you all.
2 We're all the same race. It's like, there's only
3 one race. That's God's grace. So it's not about
4 that. But I do not trust my government. I do not
5 trust your government. Governments just have a way
6 of putting on too much regulation. So I'm against
7 the regulations, I'm for clean air, and I think
8 everybody in this room is probably the same way.

9 The more regulation makes it sound like
10 we're going to have cleaner air than we do now or
11 it's going to stop heavy pollutants. But I agree
12 with Kelly. We're going to stop the heavy pollutant
13 anyhow with a Class II designation. You don't have
14 to go to the Class I. I just feel that's not
15 necessary. But I want clean air. I agree with
16 that.

17 (Applause.)

18 MR. FIELDING: Next speaker is Floyd
19 Christman.

20 MR. CHRISTMAN: I thought I was just
21 signing in.

22 (Laughter.)

23 MR. CHRISTMAN: That's really all I want
24 to do.

25 (Laughter.)

1 **MR. CHRISTMAN:** I have felt like the first
2 guy that came up and spoke. He was spot on. This
3 is a done deal. These are all just going through
4 the motions to get Class I. There are no real set
5 parameters to it. If you fill out the paperwork
6 right, you get it. So, we're just filling out
7 paperwork. It's interesting that we're concerned
8 about the environment. I hear the word "fish" come
9 up. And yet, I'm going to a meeting on Thursday
10 because they're poisoning the fish in the river and
11 the creeks so they can plant different fish. So
12 tell me that you're concerned about the environment
13 and the fish.

14 It seems to me we could leave well enough
15 alone. These are doing fine the way they are. Even
16 though those fish were planted in there 80 years
17 ago, what, are we going to do this every 80, 100
18 years? Kill everything off and try something new?
19 It's ludicrous. As far as industry goes -- and
20 again, we're all concerned about pollutants -- they
21 already have a class called Class II. That's what
22 we live in right now. Anybody here feel too sick
23 from the pollutants?

24 **AUDIENCE MEMBER:** No.

25 **AUDIENCE MEMBER:** (Indiscernible) smelter.

1 **MR. CHRISTMAN:** I don't. I don't feel it.
2 This Class I redesignation is ludicrous. It is
3 above and beyond the call of duty of what any of us
4 need or want in clean air. And the way I see it,
5 there isn't too many steel mills or refineries that
6 are taking our doors down to get in here. And the
7 few that might, industries that might come our way,
8 well, they're going to be classed under a Class II
9 already, which has already given us clean air.
10 Thank you very much.

11 **(Applause.)**

12 **MR. CHRISTMAN:** I believe that's all.

13 **MR. FIELDING:** Going once. Going twice.
14 Next person on our list is Gloria Bobo (phonetic).

15 **MS. BOBO:** Actually, I thought I was
16 signing an attendance list.

17 **(Laughter.)**

18 **MS. BOBO:** And I am not really prepared to
19 speak, but I do have a few questions that the fellow
20 at the desk -- well, the people that were signing
21 people up didn't seem to have an answer for. One of
22 my questions is, how long has this proposal been on
23 the table; and why is it that the community has only
24 in the past week been made aware of this?

25 **AUDIENCE MEMBER:** Amen.

1 (Applause.)

2 MS. BOBO: I also ask if there was an EPA
3 representative here so that we could ask this
4 representative of the EPA questions directly rather
5 than getting it filtered through the tribe or other
6 representatives that might be biased. I would really
7 think that we should have another public meeting and
8 have -- what am I doing wrong?

9 MALE SPEAKER: Hold the silver part.
10 There you go.

11 MS. BOBO: Hold it up?

12 MALE SPEAKER: Yeah.

13 MS. BOBO: Oh, sorry. I really think we
14 should have another public meeting and ensure that a
15 representative from the EPA is here.

16 (Applause.)

17 MS. BOBO: And I'm hoping that what Mr.
18 Baker said, that he thinks it's a done deal, I don't
19 want it to be a done deal. It is not fair that -- I
20 understand that the tribe has over 200-and-some
21 members, but only -- well, I (indiscernible), but
22 not -- a majority of these tribal members are not
23 old enough to vote, and it was less than 100, right,
24 that made this decision to apply for this
25 redesignation that is going to affect the county.

1 Although it says Class I will only include the
2 tribal reservation, we all know that that's not
3 true. I mean, why is everybody here so concerned if
4 it's only going to affect the Kalispel tribal land?

5 **AUDIENCE MEMBER:** Sixty-mile radius they
6 want.

7 **MS. BOBO:** Well, everybody that lives in
8 the county lives within a 60-mile radius. So, yes,
9 we have a right to be concerned and I am concerned
10 by (indiscernible) Cusick for over 30 years. We
11 lived in our home on Flowery Trail for over 50 years
12 and I worked at Ponderay Newsprint from the time
13 that it was being constructed until I retired in
14 1998. My husband taught a lot of you, including a
15 lot of the tribal members, tribal members' children
16 and grandchildren, and we love the area. We would
17 never -- in fact, I told my kids I wanted to put it
18 in my will that they could never sell our land. And
19 all of them came down and said, "Don't worry, mom.
20 That ain't going to happen. We'll keep
21 (indiscernible) for the kids and grandkids.

22 **MR. FIELDING:** Thank you, Ms. Bobo. Your
23 three minutes is up.

24 **MS. BOBO:** And we respect the tribe.
25 Truly we do. And we admire the tribe for what

1 they've done (indiscernible) and we've cheered all
2 your efforts, truly. But I think that we need some
3 answers to our concerns. So is this the last meeting
4 that's going to be available for the public to
5 attend?

6 MR. FIELDING: (Indiscernible) comments --

7 MS. BOBO: Decisions (indiscernible) --

8 (Multiple people speaking.)

9 AUDIENCE MEMBER: How about an answer?

10 MR. FIELDING: Well, Ms. Bobo, there will
11 be (indiscernible) Q and A after everybody has
12 spoken. I think the -- and I'm sure the staff will
13 (indiscernible) --

14 MS. BOBO: So we won't be able to have
15 another public meeting with the EPA present?

16 MR. FIELDING: I would have to check with
17 the (indiscernible) --

18 (Multiple people speaking.)

19 MR. FIELDING: I can't answer that
20 question for you right now.

21 MS. BOBO: So as far as you know, this is
22 our last opportunity?

23 MR. FIELDING: I'm not saying it is. I'm
24 just saying I can't (indiscernible).

25 MS. BOBO: Somebody must know if there

1 will be an opportunity for --

2 (Multiple people speaking.)

3 MR. FIELDING: All these answers (sic)
4 will be answered in a Q and A after everybody has
5 spoken, so --

6 MS. BOBO: Will it be better publicized?
7 Everybody (indiscernible) only after interviewing
8 tribal members because it was very slanted.

9 MR. FIELDING: I'm having to take this --

10 (Audience erupts with comments and
11 applause.)

12 MS. BOBO: After coming here --

13 AUDIENCE MEMBER: Yeah.

14 MS. BOBO: -- and (inaudible) of the EPA
15 here to give us more actual details.

16 MR. FIELDING: (Indiscernible) answer that
17 question (indiscernible).

18 MS. BOBO: Then answer this question.
19 Will the designation -- when is it going to be
20 approved? What is the schedule?

21 MR. FIELDING: This is one piece of a very
22 long process. This is going to be a very long
23 process, a really long process.

24 MS. BOBO: So there will be an opportunity
25 for another public meeting?

1 MR. FIELDING: (Inaudible.)

2 MS. BOBO: Okay. Well, for -- for signing
3 up for what I thought was an attendance sheet,
4 you're probably wishing I would just shut up and sit
5 down.

6 (Laughter and applause.)

7 MS. BOBO: You know, you know me, you old
8 friend. We respect you and we trust you, but I
9 would like to see, if I'm respecting you and
10 trusting you, the fact that this kind of slipped
11 under the radar and this is a -- you can tell from
12 the amount of people here that this is a concern to
13 the whole community, and I believe we have a right
14 to be heard further before the decision is made.

15 (Applause.)

16 (Multiple people speaking.)

17 MS. BOBO: Okay. I'll sit down and shut
18 up.

19 MR. FIELDING: (Indiscernible).

20 (Applause.)

21 MR. FIELDING: The next speaker who signed
22 up is Leonard Browning.

23 MR. BROWNING: My name is Leonard
24 Browning, and I got a couple hundred acres up on
25 South (indiscernible). I moved to Priest River in

1 1955, and I've been all over this country. I've
2 lived around here. I've hunted, I've logged, and
3 I've seen a lot of changes since I came here. Like
4 they said, they were (indiscernible) Priest River
5 (indiscernible). The dance in the streets. People
6 had money. We burnt wood. We (indiscernible) and
7 we bought fish. I logged up 60-acre (indiscernible)
8 and cut big cedar up there, and I (indiscernible).
9 And I (indiscernible).

10 They belonged to the Indians, but they
11 didn't bother me because I'm a person. I'm human.
12 And so are they. And the Kalispel Tribe has received
13 a raw deal ever since they have let the white guy
14 come in. Put it that way. And the government said,
15 give me your gun and we'll take care of you. Well,
16 how did that work out? Now the government comes in
17 and says, we're going to regulate the air and the
18 water.

19 How's that going to work out? Well, in the
20 first place, there's enough regulations now. If
21 they were enforced, they damn sure wouldn't need
22 anymore, number one. And number two, how many of
23 you have read this draft? How many people are here
24 from Sandpoint? How many people are here from
25 Priest River? There you go. You should really read

1 this draft and see what it says. It's a draft of
2 the proposed regulations that (indiscernible). Let
3 me get my glasses here. I used to call them
4 cheaters, now (indiscernible).

5 It says here that the tribe has been
6 authorized by the EPA since 2002 to implement
7 subject to the 303(c) and 401 of the Clean Water Act
8 in the same manner as the state. The EPA is
9 absorbing the Kalispel people as a state. It's
10 right here in black and white. Excuse me. They've
11 got (indiscernible). And down there it says that the
12 waters will include all discharges from non-point
13 sources. So all the waters that are discharged
14 outside the reservation is non-point. So figure
15 that one out. Every bit of water that
16 (indiscernible) in the Kalispel Reservation will be
17 checked by the EPA. And you know how they check
18 things.

19 I have a friend up in Priest Lake. He got
20 building permits to build a new house. He built the
21 foundation, had his structure up, and the EPA came
22 in and said: You have to close that ditch. He
23 said: What do you mean, close that ditch? Water
24 only runs on it in the spring. And the Forest
25 Service has a camp here, and they just have a little

1 road to cross and they claim the creek -- or the
2 (indiscernible) all the time. Well, they charge you
3 \$10,000 a day. All homes (indiscernible).

4 His name is Jack. Well, he finally had to
5 go to the United States Supreme Court with the
6 \$10,000 he was being charged every day for violating
7 a non-creek. And it cost him enough money that he
8 lost his wife. He lost his complete nest egg. He
9 lost his house. So that's what the government does
10 to you. They're not coming in here to govern the
11 water. They're coming in here to control the
12 people. They don't care whether it's the tribe or
13 it's anyone else. They're trying to control --

14 MR. FIELDING: Your time is up. Thank
15 you.

16 (Applause.)

17 AUDIENCE MEMBER: Where's that draft?

18 AUDIENCE MEMBER: Yeah, where do we get
19 that draft?

20 MR. BROWNING: The library. They don't
21 have any more. What'd I tell you?

22 AUDIENCE MEMBER: It's online.

23 MR. FIELDING: The next speaker who signed
24 up is Jason Adams.

25 MR. ADAMS: Hey, how's it going? I never

1 spoke in front of everybody, but I was sitting back
2 there listening (indiscernible). Y'all have a good
3 point. None of us want to be regulated by the
4 government. (Indiscernible) want the government
5 here regulating us a little more? Right? That's
6 the way simply I felt. I thought, I can't believe
7 they're going to (indiscernible) more regulation.
8 They're going to come here and they're going to
9 eliminate my fireplace. They're going to eliminate
10 a few (indiscernible) in my life. Well, take the
11 alternative. You know, I was mad at first. I --
12 going home, I started Googling things, started
13 looking it up. Look at the smelter.

14 Look what it's going to do to the
15 (indiscernible). You go around -- you want to talk
16 about jobs? That's only going to be a hundred
17 assembly jobs for this area, for a lifetime of the
18 smelter. They're opening up in most places like a
19 third-world country, Indonesia. Other places like
20 that. You take a look at that, and you want that
21 down the road from us? No. I say no. You're
22 talking about 117 jobs. Most of you won't even be
23 qualified to work there. It's going to be
24 Californians coming here taking those jobs. It's
25 not more jobs.

1 It's not our jobs. They're protecting us.
2 The only thing that means this is going to go
3 through is because of the reservation. And it's
4 going to save your kids and everyone else's kids
5 from living right next to a smelter.

6 I ask you guys just this one to yourself -
7 - one favor before you make the judgment on this:
8 Go home. Look up what a smelter is going to do.
9 Look what it will do. Those particles, they know
10 they won't go away. They go into your lungs, they
11 cause cancers and the cancers grow. It's going to
12 destroy the environment. It's going to destroy this
13 valley. Has anybody ever watched how long it takes a
14 fireworks show for the smoke to go -- to clear, or
15 grass-burning season, how long it takes the smoke to
16 clear from that? That's (indiscernible) --

17 **AUDIENCE MEMBER:** Or a forest fire.

18 **MR. ADAMS:** -- this valley.

19 **AUDIENCE MEMBER:** Or a forest fire.

20 **MR. ADAMS:** Or a forest fire.

21 **AUDIENCE MEMBER:** (Indiscernible) trapped
22 in the valley.

23 **MR. ADAMS:** So, yeah, so talk about that.
24 But to add silicon to it, you're going to breathe
25 that silicon for the rest of your days. Your

1 children will breathe it. They're grand- -- your
2 grandchildren will breathe it. We're all going to
3 breathe that. That's what's going to happen. We do
4 not need a third-world smelter in this county.
5 That's what I got to say, and that's it. Stop the
6 mining.

7 (Applause and shouts from the audience.)

8 MR. FIELDING: The next person who signed
9 up to speak is Mona (indiscernible).

10 MONA: First of all, I don't think three
11 minutes is long enough. I don't know much about
12 what's going on (indiscernible). I don't know what
13 this number one and number two is. I don't know the
14 difference. I do know that I voted against
15 (indiscernible). I know a lot of people voted for
16 it. It didn't stick to its promises. When you come
17 down the river and we see three power plants coming
18 out there, I'm sorry, but it's just hard for me to
19 believe that anything that drains into the river is
20 clean. It's (indiscernible).

21 I don't care what you do to it before it
22 goes into the river. I just don't believe that it's
23 good for the river. I've been here all my life, too.
24 I've lived on the reservation all of my life and --
25 so my -- our aboriginal territory is all the way

1 from Canada all the way into Montana. So this has
2 been our home forever. And now this is what we're
3 confined to. I am against -- I'm also against what
4 the gentleman said earlier. I don't like how we are
5 messing with the fish. But I do hope that we do have
6 one or more meetings and I'd like to do my homework.
7 I don't -- you guys know I'm concerned about jobs.
8 I came from Standing Rock. I went over there to
9 fight for the water over there and right now I
10 haven't been in the fight against that smelter here.

11 (Applause.)

12 MR. FIELDING: The next speaker that
13 signed up is Christy Huling.

14 MS. HULING: I am from Priest River,
15 originally from Montana. I grew up in a small town
16 called Victor, Montana, graduated with 15 in my high
17 school class, so I know what it's like to be in a
18 small-town area. Kids in Victor, Montana can't find
19 a job anymore because the Victor and Montana people
20 and Victor Valley voted in such things like this
21 because we have a lot of people concerned about the
22 environment. I moved here because this is what my
23 hometown used to look like before regulation came
24 into play. I've worked in a planning department at
25 (indiscernible). I worked in your health district,

1 so I vaccinated some of your kids and took their
2 records.

3 I worked with them through Lily Pappas
4 (phonetic). I've helped my (indiscernible) develop
5 some of this up in the county through onsite sewage
6 systems. I've worked with a lot of people here. I
7 currently am a college and career counselor at
8 Priest River Lamanna High School. Our students,
9 whether they be in Priest River, Cusick, Usk, you
10 name it, don't really have much of a future as far
11 as employment in this area unless, of course, we
12 work for the tribe, which is a pretty big employer
13 here. So between the tribe and our county
14 departments and our school districts, those are our
15 big employers.

16 I tell kids every day to go get some sort
17 of education because they are not going to be able
18 to find a job in this area, which is really hard for
19 me to do because I would rather see this community
20 grow instead of it having slipped. I have been on a
21 meeting group with the Mackinaw issue, fish, same
22 one that my husband -- we're both very passionate
23 about fish in this community. The tribe is actually
24 financing some of the (indiscernible) habits of the
25 outdoor portion of Priest Lake. I've been on that

1 group for four years now. And I'm watching where
2 (indiscernible).

3 And if you start following the money,
4 you're going to start seeing where the agenda is. So
5 I have to wonder where this money is following to,
6 because I've seen what's going on at Priest. I've
7 seen what's going on in this river, and I've seen
8 what the community members, whether they be tribal
9 or not -- and I've actually been referred to as a
10 bigoted opinion. So I wanted to set the record
11 straight here in front of many more people than
12 (indiscernible) in the first place. My family
13 members take care of tribal member children in this
14 same Camas Center.

15 I don't care what color a child is. I
16 care for them and I care about them. So there's no
17 bigoted issues here. The problem is, is that you
18 guys have more money than the mass of us have to put
19 together. So it's hard to fight against big money,
20 and it's hard to fight against big government,
21 regardless of where their history comes from. I
22 don't want this. It needs to not come.

23 (Applause.)

24 MR. FIELDING: The next speaker is John
25 King.

1 MR. KING: I'm not much on speaking in
2 public, but I would like to say that I'm a 50-year
3 member of the (indiscernible).

4 AUDIENCE MEMBER: Yeah, (indiscernible)
5 Idaho.

6 MR. KING: And I have worked at Moses Lake
7 where one of these refineries exist. And on that
8 facility, while I was down there, there was an
9 explosion that killed three people. There was also
10 a time when we had evacuated the community because
11 of contaminants. There's xylene gas involved in it
12 and things that can (indiscernible) atmosphere with
13 coal dust and (indiscernible). So it's just
14 something to think about, if we're so excited about
15 getting a smelter in the area. (Indiscernible)
16 because it's your lives and your children's lives.

17 This lady says she was from Montana and
18 all about how bad regulations are. Think about
19 Libby, Montana, with all of the cancers that were
20 caused for the children and the deaths that are
21 caused by pollutants from big business. There's
22 several examples of all of that type of thing in
23 (indiscernible), Idaho, and here in our whole state.
24 So please consider all of that before you make this
25 decision if you want to go forward with a smelter.

1 The things it causes if we allowed it.

2 (Indiscernible) create jobs for a while --

3 **(Multiple people speaking.)**

4 **MR. KING:** -- you really want them 170
5 jobs? And the people who want to put it here aren't
6 even near this town. (Indiscernible) here and
7 talking about it. You need to consider what's going
8 on. That's all I have to say. Thank you.

9 **(Applause.)**

10 **MR. FIELDING:** The last person that's
11 signed up to speak is Carl (indiscernible). All
12 right. Going once. Going twice. That concludes
13 all the people who have signed up to speak. We are
14 going to have some (indiscernible) staff come up and
15 do a short Q and A, take questions from the
16 audience, hopefully answer some of the questions you
17 might have so you leave here with more answers than
18 questions.

19 **(Whereupon, the public hearing portion of**
20 **the meeting was concluded.)**

CERTIFICATE

I, Sheri L. Schneider, do hereby certify that the proceeding named herein was professionally transcribed on the date set forth in the certificate herein; that I transcribed all testimony adduced and other oral proceedings had in the foregoing matter; and that the foregoing transcript pages constitute a full, true and correct record of such testimony adduced and oral proceeding had and of the whole thereof.

IN WITNESS HEREOF, I have hereunto set my hand
this 19th day of April, 2017.

Sheri L. Schneider
